PUBLIC FIRE PROTECTION

For the 802 public fire hydrants owned and maintained by the Brunswick and Topsham Water District (the District) and connected to the District's mains on February 1, 2021, there shall be paid to the District the following public fire protection charge:

| | <u>Hydrants</u> | <u>Quarterly</u> | <u>Annual</u> |
|-----------|-----------------|---------------------|---------------------|
| Brunswick | 544 | \$149,835.50 | \$599,342.00 |
| Topsham | 258 | \$71,061.75 | \$284,247.00 |
| | <u>802</u> | <u>\$220,897.25</u> | <u>\$883,589.00</u> |

For each public hydrant owned and maintained by the District and installed after February 1, 2021, charges will be governed by Chapter 69 of the Maine Public Utilities Commission's Rules and Regulations.

Proposed Effective Date: February 1, 2021

Docket Number: 2020-00314

Effective Date:

Craig Douglas
General Manager

PRIVATE FIRE PROTECTION

These rates only apply to private fire protection service for use solely on the customer's premises. For each private fire hydrant owned and maintained by the customer, there shall be paid to the District an annual charge of \$1,540.00, to be billed in quarterly installments.

For service connections to the District's mains used to supply sprinkler systems or any other appliances used solely for fire protection purposes, there shall be paid to the District an annual charge based on the number of inches of diameter, to be billed in quarterly installments, as follows:

| <u>Private Fire Service</u> <u>Diameter, inches</u> | <u>Quarterly</u> | <u>Annual</u> |
|--|-------------------------|----------------------|
| 1-inch | \$49.00 | \$196.00 |
| 1.5-inches | \$49.00 | \$196.00 |
| 2-inches | \$134.00 | \$536.00 |
| 3-inches | \$198.00 | \$792.00 |
| 4-inches | \$263.00 | \$1,052.00 |
| 6-inches | \$385.00 | \$1,540.00 |
| 8-inches | \$510.00 | \$2,040.00 |
| 10-inches | \$635.00 | \$2,540.00 |
| 12-inches | \$755.00 | \$3,020.00 |

1. Where there is only one sprinkler system, the charge will be calculated according to the diameter of the connection at the District's main or the diameter of the riser pipe, whichever is smaller. The riser pipe is defined as the pipe that is connected to and located immediately above or downstream of the system check valve.
2. When there are multiple sprinkler systems located on the same site, either in multiple buildings or in a single building, the charge will be calculated according to the diameter of the connection at the District's main or the sum of the diameters of the riser pipes, whichever is smaller.
3. When there are multiple sprinkler systems located on the same site, either in multiple buildings or in a single building, and multiple connections to the District's main, the charge will be calculated according to the diameter of the District's main, the sum of the diameters of the connections at the District's main, or the sum of the diameters of the riser pipes, whichever is smaller.
